

ТОРМОЗНЫЕ КОЛОДКИ и ДИСКИ

КАТАЛОГ
2011

ТОРМОЗНЫЕ КОЛОДКИ

Тормозные колодки TSN обеспечивают эффективное торможение при эксплуатации в различных климатических условиях.

Срок службы в 1,5 раза выше стандартного ресурса.

Обладают стабильными показателями коэффициента трения (0,4–0,5) в широком диапазоне рабочих температур.

Фрикционная безасбестовая композиция изготавливается из материалов ELIOKEM (Франция).

Специальные добавки фрикционной смеси обеспечивают бережное отношение к тормозным дискам.

Прессование накладки производится методом горячего прессования, по которому изготавливаются все лучшие накладки мировых брендов, включая спортивный вариант.

В зависимости от модели, колодка оснащается каналом для отвода тепла и грязи с взаимодействующих поверхностей.

В зависимости от конструкции, требуемой заводом-производителем автомобилей – используется индикатор износа (механический или электрический).

Фрикционная накладка надежно закреплена на корпусе колодки специальным клеем при температуре около 100 градусов, что обеспечивает 3-х кратный запас прочности.

ТОРМОЗНЫЕ ДИСКИ

Точная балансировка дисков, отсутствие биения и вибрации.

Изготовленные из чугуна марки High Carbon, обладают лучшей теплопроводностью и обеспечивают бесшумное торможение.

Одинаковы эффективны при высоких и низких температурах.

КАТАЛОГ ТОРМОЗНЫХ КОЛОДОК И ДИСКОВ

(+)	с, включая
(-)	без, исключая
4x4	полный привод
RWD	задний привод
FWD	передний привод
ABS	антиблокировочная система
ASRw	антипробуксовочная система
ESP	электронная система динамической стабилизации
EDS	система электронной блокировки дифференциала
manual	автомобиль с механической трансмиссией
automatic	автомобиль с автоматической трансмиссией
(+sensor)	с датчиком износа тормозных колодок
ventilated	вентилируемый тормозной диск
2 piston caliper	двухпоршневой суппорт
4 piston caliper	четырёхпоршневой суппорт
retaining pin	фиксирующий штифт
sport package	спорт-пакет
sport suspension	спортивная подвеска
WB short/long	короткая/длинная база
(1LQ, 1ZM...)	вариант оснащения
