

## КАК ВЫБРАТЬ НАИЛУЧШИЙ АККУМУЛЯТОР?

Если Вы нашли автомобиль в таблице использования, следите за указаниями схемы, для определения, который из наших продуктов наиболее подходит к требованиям клиента.

\* Заменяемые батареи на гибридных автомобилях должны всегда соответствовать технологии оригинальных батарей.

# EXIDE® BATTERIES

## БОЛЬШЕ ТРЕБОВАНИЙ К ЭНЕРГОПОТРЕБЛЕНИЮ ЧЕМ РАНЬШЕ

В последние годы, энергопотребление современных автомобилей выросло на 300%. Для того, чтобы выбрать правильную батарею, уже недостаточно знать объем и мощность двигателя и установленное электрооборудование, но также надо знать даже климат и условия вождения.

Программа Exide Evolution разработана для того, чтобы помочь выбрать правильную батарею.

Программа Exide Evolution гарантирует выбор наиболее подходящей батареи для удовлетворения ваших требований.

## EXIDE PREMIUM

Exide Premium выдает энергию, высокую емкость и пусковую мощность — все находится в одной батарее.

Высокотехнологичный производственный процесс, особое качество материалов позволило разработать батарею с:

1. увеличенным сроком эксплуатации по сравнению со стандартной батареей благодаря:

- лучшему сопротивлению к разряду и лучшему заряду из-за улучшенного сцепления активной пасты с металлической решеткой;
- резерву большей емкости, обеспеченной использованием более толстых пластин;
- лучшему сопротивлению к коррозии, достигнутой использованием метода вытяжки решетки (Exmet) и использованием усовершенствованных металлических сплавов.

2. высокой пусковой мощностью и устойчивостью при всех погодных условиях, приводящая к значительно большему количеству пусков двигателя.

СООТВЕТСТВЕННЫЙ ДЛЯ

мощные дизельные двигатели или бензиновые двигатели;

богатое оснащение;

экстремальная температура;

интенсивно использованный автомобиль;

соответствует требованиям т.н. первого оснащения;

+30%

дополнительная мощность в сравнении со стандартным аккумулятором;

- продолженное время использования продукта в стандартном аккумуляторе;
- в двойную сваренная, герметически закрытая крышка, которая не открывается и является конкурентно безопасной;

- магический глазок;
- запатентованная система лабиринтов, предотвращающая утечку электролита;
- полностью необслуживаемый;

ПРЕИМУЩЕСТВО

СООТВЕТСТВЕННЫЙ ДЛЯ

большинство современных автомобилей;

стандартное оснащение;

стандартно использованный автомобиль;

ПРЕИМУЩЕСТВО

+15%

дополнительная пусковая мощность в сравнении со стандартным аккумулятором;

- центральная дегазация с противоискровым обеспечением
- полностью необслуживаемый;

магический глазок;

EXIDE EVOLUTION

Экономичное решение для старых автомобилей с элементарным оснащением

двигатели  
дизельные  
и бензиновые  
двигатели  
≤ 1.6 л объем;

двигатели  
дизельные  
и бензиновые  
двигатели  
> 1.6 л объем;

Аккумулятор всегда должен иметь достаточную пусковую мощность, приспособленную к объему и мощности двигателя. Используйте, рекомендованные производителем автомобиля, минимальные параметры аккумулятора.

Пусковая мощность это ток пуска (в Амперах согласно с EN [A(EN)]) поставляемый аккумулятором.

Для мощных бензиновых двигателей и для двигателей дизельный требуется пусковая мощность, которая является важным критерием выбора.

## 1 ОБЪЕМ И ВИД ДВИГАТЕЛЯ

Каждый автомобиль,  
в зависимости от мощности,  
уровня оснащения, его  
использования или условий,  
в каких работает, имеет свой  
индивидуальный запрос  
на энергию.

стандартно  
используемый  
автомобиль

интенсивно  
используемый  
автомобиль

## 4 УСЛОВИЯ ИСПОЛЬЗОВАНИЯ

Интенсивный способ использования характеризуется увеличенным количеством пусков автомобиля и преодолением коротких дистанций, что приводит к использованию дополнительной энергии аккумулятора. Система зарядки в автомобиле (альтернатор) не всегда достаточно зарядит аккумулятор во время езды на коротких дистанциях, чем снижает его объем и приводит к краткому времени пользования.

У случае интенсивного использования, аккумулятор должен обладать высшим объемом для удержания долгого периода использования и его потенциала.

Аккумулятор является источником энергии, поставляемой по всему автомобилю. Количество доступной энергии в системе электричества пропорциональна объему аккумулятора, измеряемая в Амперах на час (Ah).

Новейшие автомобили оснащены многими устройствами безопасности, повышающими комфорт и удобство: кондиционер, GPS, DVD, сидение с подогревом и т.д.

Чем выше уровень оснащения, тем больше объем аккумулятора требуется для поставки необходимой энергии, установленным в автомобиле устройствам.

## ОСНАЩЕНИЕ 2

стандартное оснащение:

- компьютер;
- радио и CD;
- сигнализация;

богатое оснащение:

- кондиционер;
- навигация GPS;
- расширенная аудио-видео система/DVD;
- сидение с подогревом;
- расширенная система отопления;
- дополнительный тюнинг оснащения;

EXIDE EVOLUTION

## КЛИМАТ 3

Экстремальная температура может влиять на работу аккумулятора и время его использования. Высокая температура работы разрушает активный материал в коробке и приводит к коррозии решетки. Это влияет на работу аккумулятора и сокращает время его использования (в два раза при каждом повышении температуры работы на 10°C).

Ускоряет также процесс саморазрядки, влияет на работу и уменьшает объем аккумулятора (в два раза при каждом повышении температуры на 10°C). Работа при высокой температуре, необходимо подобрать аккумулятор большего объема — для удержания его потенциала и долгого времени использования. В условиях холодного климата растет внутреннее сопротивление в аккумуляторе, снижается его пусковая способность и способность принятия разряда. Автомобили работающие в таких условиях нуждаются в аккумуляторах с высшим током пуска для обеспечения надежности запуска двигателя.

умеренная температура;

экстремальная температура;

## ПОЛНЫЙ АССОРТИМЕНТ ПРОДУКТОВ МИКРО-ГИБРИДНЫХ ТРАНСПОРТНЫХ СРЕДСТВ

Готовые к значительному увеличению своего присутствия на автомобилестроительном рынке, с оперативной точки зрения микро-гибридные транспортные средства предлагают наиболее реальные и надёжные технологические решения. Именно поэтому большинство автопроизводителей выпустили, используя эту технологию целый ряд новых автомобилей оснащённых следующими системами:

### ОБОРУДОВАНИЕ ТРАНСПОРТНЫХ СРЕДСТВ MICRO-HYBRID

© BMW AG

Regenerative  
Braking

#### РЕКУПЕРАТИВНОЕ ТОРМОЖЕНИЕ

После того как водитель снимает ногу с педали газа, стартер-генератор немедленно преобразует кинетическую энергию автомобиля (скорость вращения генератора) в электрическую энергию, которая, в свою очередь, подзаряжает аккумулятор. Способность принять заряд и работать в циклическом режиме имеет ключевое значение для правильной и надёжной работы такой системы.

© FIAT GROUP AUTOMOBILES

#### УСТРОЙСТВА, СНИЖАЮЩИЕ РАСХОД ТОПЛИВА

Вот примеры специальных микро-гибридных устройств, призванных снизить расход топлива и сократить вредные выбросы:

- интеллектуальные генераторы переменного тока,
- индикаторы переключения передач,
- интеллектуальная энергетика и электронное управление температурой,
- термоэлектрические генераторы,
- системы Управление по проводам и Торможение по проводам.

Любое дополнительное оборудование будет выступать в качестве дополнительной энергетической нагрузки аккумулятора.

#### ОСТАНОВКА И ЗАПУСК

Stop/Start  
System

В целях экономии топлива эта система позволяет двигателю отключаться при движении автомобиля на холостом ходу, во время остановок на светофорах и в пробках.

Всякий раз, когда автомобиль останавливается, все электрические устройства получают энергию от аккумулятора, работая в качестве дополнительной нагрузки батареи.

Необходимость повторного запуска двигателя после каждой автоматической остановки увеличивает нагрузку и количество циклов разрядки-зарядки аккумулятора, который должен обладать более высокой энергоёмкостью и выносливостью на протяжении всего срока службы.

## MICRO-HYBRID – РЕШЕНИЕ ФИРМЫ EXIDE

**AGM** ABSORBENT GLASS MAT TECHNOLOGY

Stop/Start System

Regenerative Braking

Superior Equipment

Intensive Urban Use

Удовлетворяют самым высоким требованиям к аккумуляторам

Разработанная совместно с крупнейшими производителями автомобилей в Европе специально для микро-гибридных транспортных средств, технология Exide AGM (Absorbent Glass Mat) прекрасно подходит для прогрессивных микро-гибридных транспортных средств, оснащенных системой остановки и запуска Stop & Start. Современная технология призвана обеспечивать оптимальную работу в экстремальных условиях циклической нагрузки с возможностью принятия большого заряда и при не полностью заряженном аккумуляторе. Эти факторы являются абсолютно ключевыми для микро-гибридных транспортных средств, оснащенных системой остановки и запуска Stop & Start и системой рекуперативного торможения.

- Оригинальные технологии и высокое качество.
- Экстремальная долговечность и производительность, в три раза превышающие возможности традиционных аккумуляторов.
- Максимальная безопасность: Герметично закрытые аккумуляторы с надёжной VRLA-системой рекомбинации газов обеспечивают максимальную безопасность при установке в кабине автомобиля.

**ECM** ENHANCED CYCLING MAT TECHNOLOGY

Stop/Start System

Superior Equipment

Intensive Urban Use

Разработанная совместно с крупнейшими производителями автомобилей в Европе специально для микро-гибридных транспортных средств, технология Exide ECM прекрасно подходит для стандартных микро-гибридных транспортных средств, оснащенных системой остановки и запуска Stop & Start:

- Оригинальные технологии и высокое качество.
- Повышенная долговечность, оптимизированная специально для циклического характера работы микро-гибридных автоприводов.
- Максимальная безопасность, герметичность, способность работать в условиях высоких температур делают Exide ECM хорошим решением в области аккумуляторов, устанавливаемых под капотом автомобиля.

TOYOTA: Yaris, Auris с системой остановки и запуска Stop & Start.  
Заключение контрактов с мировыми производителями автомобилей для рынка ЕС.

# EXIDE MICRO-HYBRID AGM

**AGM** ABSORBENT GLASS MAT TECHNOLOGY

## Подходящий для:

Гибридные автомобили

Stop/Start System

Regenerative Braking

Специально разработанные для лучших гибридных автомобилей с системой «стоп/старт» и со стартером-генератором для подзарядки батарей.

Традиционные автомобили

Superior Equipment

Intensive Urban Use

Обеспечивают очень продолжительное время работы для традиционных автомобилей с большим количеством оборудования для интенсивного использования.

Размещение батареи:

Оптимально подходит для пассажирского салона\*.

\*Для продолжительного использования выберите технологию, наиболее подходящую для размещения батареи (пассажирский салон или отсек двигателя).

## Преимущества:

• Качество гарантировано полным соответствием с регламентом «Запчасти для первичной комплектации» (BER 1400/2002/EC).

• Более чем в 3 раза увеличен срок службы по сравнению со стандартной батареей (в соответствии с EN 50342).

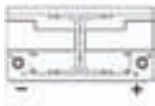

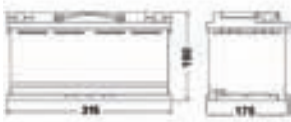

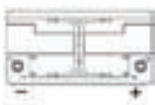

+30%

• Максимальная стартовая мощность по сравнению со стандартной батареей.

• Максимальная безопасность: герметичность (VRLA) и максимальная рекомбинация газов. Лучший выбор для установки в салон.

# EXIDE EXCELL

## Подходящий для:

большинство современных автомобилей;

стандартное оснащение;

стандартно использованный автомобиль;

## Преимущества:

**+15%**

дополнительная пусковая мощность в сравнении со стандартным аккумулятором;

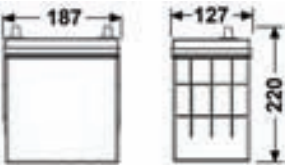

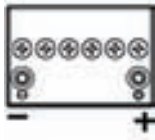

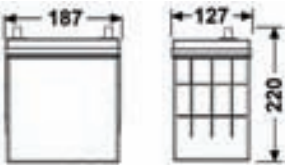

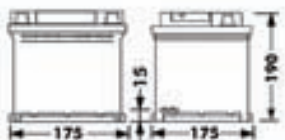

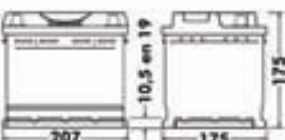

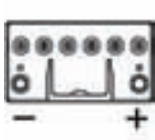

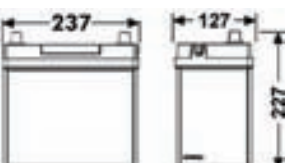

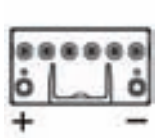

- центральная дегазация с противоискровым обеспечением

- полностью необслуживаемый;

- магический глазок;
